TAPEFUNK M10 ^{v1.0.1}

TAPE RECORDER

TAPEFUNK M10

A Rack Extension from Ekssperimental Sounds Studio and Past To Future Reverbs.

TAPEFUNK M10 is based on impulse response samples carefully recorded on tape by **Past To Future Reverbs** and then combined with hiss sampled from the original unit and DSP modelling of tube type gain stage, tape type compression and limiting in this Rack Extension by **Ekssperimental Sounds Studio**.

On the back of the unit there is a CV input to control the input gain for modulation of the amplitude.

We hope you will enjoy this soulful tape machine as much as we do!
