

# SHIMMER PADS

The background is a complex, abstract digital composition. It features a color gradient that transitions from deep blues and purples on the left to bright oranges and yellows on the right. Overlaid on this are various geometric shapes, including squares and rectangles, some of which are semi-transparent or layered. A grid of small, dark dots is visible in the upper-left corner, suggesting a digital or grid-based aesthetic. The overall effect is one of dynamic, shimmering digital energy.

# Introduction

# 4

New Loops presents Shimmer Pads for Grain – an expansive collection of 100 cinematic pads, soundscapes, ambiences, atmospheres, and drones. From bright and airy, to low and noisy, you will find a wide range of sounds with a big wash of shimmering reverb. Play them low for evolving atmospheric soundscapes or high for a sense of wonder.

These shimmer pads will be useful for many genres of electronic music including ambient, cinematic, soundtrack, game sound design, film scores, and any other music where deep sound beds and atmospheres are a required.

Please note: these grain patches are not multi-sampled instruments and use Grains Tape mode so play back like a normal sampler. Experiment with Grains other modes to get many different possibilities!

Tip – On each patch the mod wheel is assigned to the lowpass filter and aftertouch is assigned to the phaser effect.

# Installation

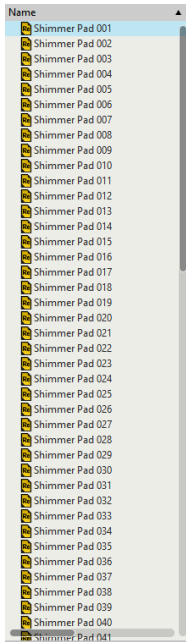

Installing this Reason Refill is easy. Simply download the zip file and unpack. You can move the Refill to your preferred place on your hard drive.

Navigate to the ReFill and double click to open it. Propellerheads Reason will start, and the Refill will be opened in the file browser.

Alternatively, you can navigate to the Refill using Reasons built in file browser and “drag and drop” the Refill onto the left side for quick access (as shown in the image).

**Please note:** Reason Refill format requires Reason Studio’s Reason 10 or later with Grain.

Please keep a backup copy of your sound pack.

# New Loops

6

New Loops is an English sound design label publishing audio sample packs and synthesiser presets in the pro audio market. With a focus on quality and usability, New Loops sounds are used by DJs, producers, music studios, and composers all over the world.
