MR SPRING REVERBERATION SYSTEM

Thank you for choosing M.R Spring

Master Room SPRING reverberation system is based on convolution technology together with digital signal processing to create a dynamic vintage sounding reverberation effect.

The IR samples has been carefully sampled from a vintage spring reverb unit from which the inspiration to this device came from.

The interface is easy and straight forward, boost the input and tweak the EQ to taste, blend in to the mix and set the level! Easy as one-two-three!

SPECIFICATIONS

- Input with overload indicator (2x function LED)
- 3 band equalizer
- Mix control
- Output level control
- Stereo in- and outputs
